1. Executive Summary

BabyEuro is an auto rewards defi token on the BSC network that rewards its holder with Ethereum. BabyEuro is THE token that many crypto experts believe will be one of the best performers when the bull market returns.

It allows OUR community to be the ones receiving one of the most valuable assets as a reward for investing and believing in our project.

Why create the token? As anyone who has invested earlier, you end up being involved in rug after rug, bleeding our wallets dry. We thought how can we stop this and help people who were in these coins as well?The answer: CREATING OUR OWN TOKEN; a SAFE investment.

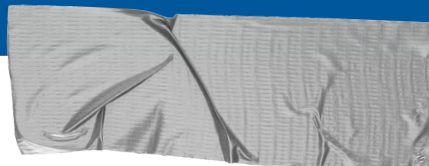

2.1 Tokenomics

BabyEuro Token Bag Details:

- **Total Supply**
2.000.000.000
- **Total Burned**
1.000.000.000
- **Circulating Supply**
900.000.000
- **Transaction Tax**
18%
on buys & sells

contd...

2.2 Tokenomics

Transaction Tax Breakup:

- 2% LP
- 10% rewards
- 6% marketing

Tokenomics Explanation: The higher transaction tax allows us to reward our loyal community with Ethereum. The team has implemented a dynamic system, when the trading volume is low,

The tax will become higher thus allowing our loyal HODLER's to reap the rewards. Also 6% which returns to our marketing wallet allows us to continue to get the best promotion to elevate our token.

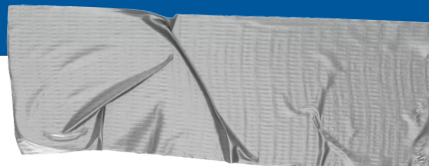

3. Exchange Listing

We are listed on PanCakeSwap. Why?

We chose this platform to list on for a variety of reasons:

- Longevity. Our vision for this project is BIG. We needed a platform that could guarantee to honor our rewards-based contract with the inevitable growth of our cult.
- Less bot activity to allow fair trading for our community.
- PanCakeSwap is the biggest BSC chain exchange platform.
- It is also incredibly easy to use with a very user-friendly interface.
